

CRYOVAC® Brand Non-Barrier Formable Paper

Lower your environmental footprint with CRYOVAC® brand Non-Barrier Formable Paper bottom web. This innovative solution is made from FSC® Certified renewable fiber* and uses 85% less plastic**.

BENEFITS

Operational Efficiency

- Designed to perform on a wide range of rollstock, thermoforming, and vacuum skin packaging equipment
- Offers a more sustainable and easy to use option without compromising throughput
- Compatible with vacuum skin packaging formulations

Product Integrity

- Engineered to provide robust product protection when paired with CRYOVAC® brand top webs
- Minimize cross contamination risk with a virtually leak-proof package

Brand Experience

- Maintains optimum taste, moisture, freshness and texture to ensure consumers have a consistent eating experience
- When paired with CRYOVAC® brand Darfresh® film, the finished product can be vertically merchandised with no product movement
- Delivers consistent performance to drive brand loyalty
- Tamper evident packaging for added security

CHALLENGE

You are continually looking for ways to lower your environmental footprint while keeping your product fresh. Providing a solution to help solve these challenges is the key to your success.

SOLUTION

CRYOVAC® brand Non-Barrier Formable Paper is our latest offering in paper-based sustainable solutions. Made from 85% paper, this innovative formable bottom web offers superior protection while reducing the amount of traditional plastic used without compromising shelf-life or product protection.

Engineered to work with VSP top webs, CRYOVAC® brand Non-Barrier Formable Paper is the ideal solution to give consumers the sustainability they want with the protection and versatility you need.
